

# Multi-Site Module

## Centralized management of multi-site systems

- 100% browser-based solution
- Ideal option for businesses with multiple, geographically dispersed locations
- Affordable, intuitive and easy to use

## Key Features

Multi-Site module allows organizations to manage their multiple sites and partitioned databases in an easy and cost effective manner.

- Manage application accounts
- Restrict application account access to selected sites and data partitions.
- Host multiple clients within a single multi-tenant database
- Effectively manage multiple tenants residing in a single building. Each tenant's data may either be shared with other tenants or completely segregated.
- Share credentials as well as users across multiple sites
- Manage application users and security from a single convenient user interface
